developing modular oriented simulation models using system

This SpringerBrief introduces the development and practical application of a module-oriented development framework for domain specific system-dynamic libraries (SDL approach), which can be used in the simulation of multi-causal and dynamic relationships on different levels of an industry, as an example the construction industry.

Developing Modular-Oriented Simulation Models Using System

Developing modular-oriented simulation models using system dynamics libraries By Christian K Karl and William Ibbs Topics: Computing and Computers

Developing modular-oriented simulation models using system

To perform process simulation using a process simulator • Convert from a process flowsheet to a simulation flowsheet, i.e., replace the process units with appropriate simulation unit. • Model and solve the process unit equations • a subroutine is written for each process unit.

Developing Modular-Oriented Simulation Models Using System

The object-oriented modular programming approach offers a powerful system modeling methodology: the encapsulation of data and functions, the reusability of ... simulation environments for developing powertrain components and control systems. The program is constructed in such a way that the whole powertrain

An Object-Oriented Modular Simulation Model for Integrated

The development and application of simulations with the purpose to explore systems and their innate, partly dynamic structures has established itself, among others, in the areas of natural sciences, business studies and political sciences.

Christian K. Karl William Ibbs Developing Modular-Oriented

This paper discussed the development of a set of object-oriented modular simulation tools for solving lumped and distributed parameter models generated in process design and simulation. The application of

object-oriented design (OOD) and modular approach greatly improves current modeling and simulation capability.

An object-oriented framework for modular chemical process

DEVELOPMENT OF AN OBJECT-ORIENTED FRAMEWORK FOR MODULAR CHEMICAL PROCESS SIMULATION WITH SEMICONDUCTOR MANUFACTURING APPLICATIONS by Jing Chen Dissertation submitted to the Faculty of the Graduate School of the

ABSTRACT DEVELOPMENT OF AN OBJECT- ORIENTED FRAMEWORK FOR

Energy Simulation of Buildings with a Modular Object-Oriented Tool Rashmin Damle¹, Oriol Lehmkuhl^{1,2}, ... The aim of this work is to develop a modular object-oriented tool "NEST" (Numerical Edifice Simulation ... The objective of this work is towards the development of a modular object-oriented building simulation tool,

Energy Simulation of Buildings with a Modular Object

Object-oriented modular architecture for ground combat simulation * V. Berzins, M. Shing, Luqi ... engineering has frequently been proven to be more cost effective than new development and is ... techniques for re-engineering the legacy software [14] to develop an object-oriented modular architecture for the Janus combat simulation system [16]. ...
